SOFTWARE DEVELOPER

SUMMARY

- 6+ years of comprehensive experience as a Java Developer, including 2 years in mobile development, specializing in the design, development, deployment, and integration of software applications.
- Expertise in the development of scalable e-commerce platforms and robust content management systems (CMS).
- Proven track record in the design and development of complex web applications using Java Enterprise Edition technology.
- Solid background in developing Android applications, integrating with both RESTful and SOAP web services.
- Proficient with both relational and non-relational databases, including sophisticated data model design.
- Deep understanding of UNIX-like operating systems and adept at server-side scripting.
- Skilled in the development and maintenance of MySQL and MongoDB databases.

TECHNICAL SKILLS

Programming Languages:	Java, Groovy, Kotlin, Golang, Python, PHP, JavaScript, Bash
Java Technologies:	Java Core, Java EE, JUnit
Markup Languages:	HTML5, CSS3, JSON, XML
Databases:	MySQL, MongoDB, Redis, SQLite
IDEs:	IntelliJ IDEA, NetBeans, Android Studio, Eclipse
Operating Systems:	Windows, Linux
Version control:	Git
Other:	Spring Framework, Hibernate, Docker, Angular, Node.js, WordPress

WORK EXPERIENCE

July 2015 - Present Senior Java Developer, New York, NY

Leading the development of a cutting-edge e-commerce platform tailored for small to medium-sized businesses, facilitating seamless online transactions.

- Spearheaded the architecture and development of the platform, ensuring scalability and robustness.
- Designed and implemented a dynamic content management system (CMS) allowing clients to manage their online presence effectively.
- Played a crucial role in team development, fostering a culture of innovation and excellence.
- Engaged in continuous improvement of the platform based on client feedback and emerging market trends.

Technologies used: Java EE, Spring Framework, Hibernate, MySQL, Angular, Docker.

March 2013 – June 2015 Android Developer, Austin, TX

Contributed to the development of Android applications aimed at enhancing business operations for various clients.

- Developed and maintained Android applications, ensuring seamless integration with existing business systems.
- Implemented RESTful web services to facilitate communication between mobile applications and server-side applications.
- Utilized Material Design principles to ensure a user-friendly interface and experience.

- Developed and optimized PL/SQL procedures for business logic and integrated them with Android applications.

Technologies used: Java, Android SDK, Retrofit, SQLite, MySQL.

September 2011 - February 2013

Java Developer, San Francisco, CA

Participated in the development of a comprehensive CRM system for a leading retail chain, enhancing customer engagement and operational efficiency.

- Developed key modules for customer relationship management and inventory control.
- Implemented a loyalty program module, integrating barcode scanners for loyalty card identification.
- Led the frontend development for several modules, ensuring a seamless user experience.
- Contributed to the creation of a personalized web presence for clients using CMS technologies.

Technologies used: Java, Java EE, JUnit, PHP, jQuery, MongoDB.

EDUCATION

2013 Master's degree in Software Engineering, University of California, Berkeley

2011 Bachelor's degree in Computer Science, University of California, Berkeley
